Dear Christopher

Peter Braynion just pointed out to me that we are continuing to receive substantial deliveries of PFC Factor VIII from Belfast. I was indeed aware that you had on one occasion made an exchange with Dr Main for some commercial Factor VIII which you had previously purchased but I did not know that the process was continuing.

So far as I know our stock level is low, and indeed the total stock situation within the SNBTS is at present very healthy and I wonder if there is some specific reason why the exchanges with Belfast are still necessary and obviously I am concerned that there may be some difficulty in our local supply situation which I am not aware of.

I would be very grateful if you would let me know if there are any problems which need to be unscrambled.

With kind regards.

Yours sincerely

DR D B L McCLELLAND  
Director
