Dr. D.B.L. McClelland,  
Director,  
B.T.S.

Dear Brian,

Factor VIII and IX Requirements

Our usage of factor VIII and IX has been fairly constant over the last few years. I would anticipate needing approximately 2.5 million units of factor VIII and 400,000 units of Defix during the current financial year. This estimate for Defix includes 100,000 units for treating Haemophilia A patients with inhibitors.

Yours sincerely,

C.A. Ludlam  
Consultant Haematologist
