Dear John,

re: NANB: Surrogate Testing

Many thanks for your letter of 28th August last. I am afraid the only two supporters of carrying out a study were Marcela and myself, the rest of the Directors were not very interested. I had intended to get together with Marcela once the holiday period was out of the way to see if we could do something positive between our two Centres. I know that Richard Tedder is interested in collaborating. I would be very happy to meet with you to try and plan some form of 'consensus meeting' and if funds could be found to get Harvey Alter over here that would be tremendous.

If I get the opportunity to talk to you during the BBTS meeting then we might possibly arrange a convenient time for us to get together. I am obviously very keen that something should be done and perhaps if the three of us rowed hard enough we could get our colleagues to move in the same direction.

With kind regards.

Yours sincerely,

I. D. Fraser
DIRECTOR
