Cardiff  
CF4 4XH

Dear Professor Bloom,

CALCIUM STABILISED FVIII

Bob Perry has shown me your results on the use of our stabilised/unstabilised FVIII concentrate and I would like to thank you very much indeed for undertaking this study.

I feel that we are now in a position where I would like to write-up our work on this topic (virtually all of our in vitro work was completed over 3 years ago).

I would very much like to include your results in this report. If you agree with this approach we would of course include you (and/or Dr. Greedharry) as authors and I would send you a copy of the manuscript for your comments prior to submission for publication.

Yours sincerely,

PETER R. FOSTER

P.S. If you agree with the above it would be helpful if you would give me details of the assays that you used including the standards.
