Dear Frank

PFC Factor VIII Concentrate (Z8)

You will be aware that PFC intend to begin routine production, hopefully in the very near future, of a new factor VIII concentrate which will be called Z8. This product will be dry heat treated at 75°C for 72 hours.

I would be most grateful if you would liaise with Chris Ludlam, Charles Forbes and Elizabeth Mayne with a view to obtaining t/2 and % recovery data on this product. I believe in the first instance we should aim at getting data from a total of 6 patients.

I understand this product will be available for trial purposes soon and a specification will be forwarded from PFC along with supplies of the product.

Kindest regards,

Yours sincerely

John D Cash
