Dear Bob

FVIII DISTRIBUTION

Thank you for your recent letter. Isobel has discussed this with you. We will be happy to reorder when our stock falls below 655 vials. We have initiated an arrangement whereby our Blood Products Section will contact your staff on a weekly basis and advise if our stock is above or below that level.

I see from the accompanying documentation from the PFC the intention is to supply us with complete batches. That is fine as far as I am concerned. We have adequate storage space and I would be very pleased when we fall below our minimum stock holding if we can be provided with a complete batch.

Kind regards,

Yours sincerely

J F Davidson
Consultant Haematologist
