Dear

COAGULATION FACTOR USAGE GRAPHS

Please find enclosed a complete set of coagulation factor usage graphs up to and including December 1991.

These graphs have been updated as requested at the Coagulation Factor Working Party Meeting on 20 January 1992.

Please note the following amendments:

- 1 Each graph has been standardised with regard to positioning and colouring of the columns.
- 2 The actual coagulation factor usage figures for Glasgow Royal Infirmary have been included in the graphs.
- 3 A 'Moving Annual Totals' graph has been introduced for Factor VIII usage in Scotland, and is enclosed.
- 4 The estimated usage (in international units) for December for Edinburgh Royal Infirmary is based on Edinburgh RTC issues (in vials) of coagulation factors during December 1991.
- 5 28 estimated usage has been adjusted upwards to reflect the reduced year end total of HPV VIII in Scotland.

Should you have any queries please do not hesitate to contact me.

Yours sincerely

Jean A Vass
Product Services Assistant
