M E M O R A N D U M

TO: Mr D McIntosh cc. J D Cash A Dickson D Innes R Stewart ✓	FROM: Dr R J Perry
SUBJECT: FVIII SUPPLIES	DATE: 03 February 1992 REF: memo/perry/92/lbrp0003.92 FILE NO: E/1/015U

Further to our discussion this morning I can summarise the position as follows:

1. Edinburgh have received the following materials since June 1991 to the end of January 1992.

HP FVIII (Lille)	-	1,006,450 iu
'Allocation'	-	928,000 iu

2. The remaining consignment of HP8 (Lille) (500,000 iu) will be delivered to PFC by 10am 29 January 1992 (250,000 iu). the balance will be supplied in the first week in February (250,000 iu). This material will secure supplies until the end of February 1992.
3. PFC have contacted Dr Murphy at S.E.B.T.S and have advised that material can be transferred from W.B.T.S. if there is an emergency clinical requirement at Edinburgh. Dr Murphy to establish whether Dr Ludlam requires this material.
4. Diane Innes will be developed as the single point of contact on matters relating to product inventory and supply.
5. The existing system for FVIII supply and PFC/RTC stock control will be established for HP as soon as possible - probably March 1992.
6. PFC will establish similar stock control/supply systems for SPSS and IVIgG w.e.f. April 1992.
7. It is imperative that the small pharmaceuticals study be carried out within the next two weeks to assure supply of HP8 beyond February since only 'semi tartan' HP8 will be available at this time. - Action R.S.
