Dear Aileen

RE: Hepatitis C in Haemophilia data

Further to our telephone conversation yesterday I enclose the additional tables giving details of the HCV status of the patients treated in the window period of September '85 to December '87.

I hope this provides you with the information that you require. Please do not hesitate to contact if you wish to discuss this further.

With kind regards  
Yours sincerely

Philip Cachia  
Consultant Haematologist

CC:

*Products used by Hep C positive patients during
