Dear Christopher

Re:

I am trying to get another 30 bottles of 8Y from Newcastle
BTS, to arrive either tomorrow or Wednesday.

It would be very helpful to me in my communications with PFC
if I can have a bit more detail about the nature of
reactions and the circumstances under which they have
occurred etc.

I have already written to asking if he can explore the
possibilities of a regular supply from England.

Kindest regards.

Yours sincerely
