NOTE

Tosca attached please.

msB

26/8/83

1. Mr Winstanley, DHSS, rang. He has received an enquiry from Medicines Inspectorate re Departmental Policy on donor serums ~~at~~ in prisons and hospitals given there is now AIDS. (He explained that E+W have tended to shy-off in part because of Hepatitis but he wondered what Scottish position was.)

2. Mr Winstanley directed me to the discussion at RTD's (Scotland) meeting on 29/3/83.

I outlined to Mr Winstanley what was said then and referred to the general position. He was interested in the reference to Dr Brooker approaching the W.P. on selection and care of blood donors and will try to explore that avenue. He will copy his response to me I, to us and mentioned the subject is being put to English RTD's at their next meeting.

3. He made the point that if policy was

was to be withdrawal, would probably need to consult (Home Office in view of the importance placed on the social responsibility aspect of such services).

Dr Beff

No doubt Brown will reply to Mr Murray; but this may be useful if nothing comes before the next SNTS Directors meeting in Sept.

3/8/83

Mr. Wasth

Thanks. I've exped the Brown / Winstanley exchange to have on hand for RTD⁵ on 13/9.
