Dr K Froebal  
Department of Medicine  
Glasgow Royal Infirmary  
GLASGOW

Dear Dr Froebal

Dr Foster of this Centre attended your BTS seminar yesterday and has reported back on some of the interesting information you presented in your talk. For obvious reasons we are very interested in your data on HTLV III antibody prevalence amongst haemophiliacs in the West of Scotland and I would judge that there will be considerable interest in your data when it is published in due course. I realise of course that the data has not yet been fully evaluated but when this is complete I would be most grateful if you could send us details before publication. Needless to say we would observe the strictest confidence for any information you are able to provide.

Dr Foster also mentioned that you were looking for samples of FVIII concentrate batches for screening purposes. It occurs to me that we may be able to help by producing samples of product batches which have been released from the Centre.

Dr Cuthbertson will be contacting you to discuss how we might help each other.

Yours sincerely

R J PERRY  
Director (Acting)
