Dear Dr Froebel

Thank you for your letter of 29 October 1984.

Of course we would be delighted to collaborate in any study of PFC FVIII batches which have been implicated in HTVL III sero conversion in recipient haemophiliacs if you are able to obtain the services of Biotest in the US. Needless to say, we are keeping a close eye on developments which may lead to the availability of an antigen assay for PFC products and when this becomes available we would expect to test PFC products for ourselves. In the meantime we are reliant on others to do the assays for us.

Finally, I wonder if it would be possible to send me a copy of Ref 3 from your BMJ letter regarding the correlation between HTVL III transmission and US FVIII? Since this publication is not yet published we would treat any data contained therein in confidence.

Thank you for your help.

With kind regards.

Yours sincerely

DR R J PERRY
Director (Acting)

Dear Dr Froebel

Thank you for your letter of 29 October 1984.

Of course we would be delighted to collaborate in the study of PCC 7V111
samples which have been implicated in HIV III in conversion in treatment
haemophilias if you are able to obtain the services of Robert in the US.
Indeed to say we are looking at these eye developments which may lead to
the availability of an antigen assay for HIV products and when this becomes
available we would expect to test PCC products for ourselves. In the meantime
we are reliant on others to do the assays for us.

Finally, I wonder if it would be possible to send me a copy of Lot 3 from your
BMJ letter regarding the correlation between HIV III transmission and PCC
7V111? Since this publication is not yet published we would like to have
contained therein in confidence.

Thank you for your help.

With kind regards,

Yours sincerely

Dr R J FERRY
Director (ACTING)
