Dear Professor Eyster

Thank you for your very prompt and full reply to my letter. The data you have sent us are of great interest.

My colleagues in the Haematology Department here are currently studying HTLV III antibody prevalence in a group of haemophiliacs treated largely with factor VIII concentrates produced here in Scotland and will I am sure be very pleased to let you have this information when it is assembled.

With best wishes.

Yours sincerely

D B L McCLELLAND
