Dear Frank,

Clinical Evaluation of Heat Treated FVIII (18/24 hours)

Following our telephone conversation I have now made arrangements for approximately 20,000 iu FVIII from the production batches to be sent to your Centre for clinical evaluation.

Batch 3401-50030 - 100 vials
Batch 3401-50020 - 100 vials

If the initial clinical evaluation of these batches proves satisfactory there seems no reason why the selected patients should not continue treatment with this material with a view to at least lengthening the clinical experience of the new product prior to routine national issue. We have plenty of material available for this purpose if necessary.

With kind regards,

Yours sincerely,

Robert J. Perry
