Dear Peter,

I enclose at last a copy of our 8Y patent specification. We have spoken briefly about what we aim to do with the product and how it has been scaled up, but of course you will be welcome to full details of its performance if you would like to visit us on a Tuesday.

Is it convenient for me to spend the morning of 26th April at PFC with you to discuss heated factor IX and, if Alan can be made to react, chromatographic factor VIII? Please phone and I will firm up my arrangements.

Yours sincerely,

*J.K.*

J.K. Smith.  
 Chief Project Scientist.
