 1988

← Phase III product being produced, having been verified as being viricidally equivalent to BGL 87. Hence, 1/2 recovery studies on 'non virgins' haemophilics are required between Feb & Dec.

← From about Sept 1987, PFE virus 87 will be produced. Hence 1/2 L & recovery studies + NANS etc on virgins haemophilics are required.

← In the meantime, any Edinburgh 'virgin' h'philics could be given BGL 87 →
