Dear Bob

Re: Z8

I have been in receipt of letters from Dr Cash and also from Bruce about the specification of Z8.

I have also received a letter from Dr Mayne saying that she will be very pleased to enter into the trials as soon as the material is available.

I think it is best if I wait until the material is actually in our cold room before I tell Dr Ludlam. What is the best way of dealing with Dr Forbes? The problem there is that normally speaking we would go through Law BTS and John Davidson, but I believe that on this occasion it would be much better if I supplied Charles direct with just a letter to Ruthven Mitchell and John Davidson saying that this has actually happened. I will only do this after I have actually been in correspondence with Charles and have had a reply from him.

It all boils down to the fact that when I have some Z8 in stock, presumably batch 60110 (the one Bruce describes to me) we can go ahead, hopefully before Christmas with the first infusions.

Kindest regards.

Yours sincerely

F E BOULTON  
Deputy Director
