Dear Bob

CLINICAL TRIAL OF NEW FVIII PRODUCT (Z8)

Ruthven has passed me a copy of your letter of 9 December. I am well aware of the reasons why you found it necessary to issue the product directly and not via John Davidson's laboratory.

However, I remain convinced that the previous problems were not caused by John's staff and I think it would be useful to my working relationship with John if you could discreetly drop him a note of the material which has been issued to Charles Forbes in order that his records of FVIII products received by the Royal Infirmary will be complete and correct. I sincerely hope that this will be possible.

With kind regards
Yours sincerely

R J C.
