EDINBURGH

Dear Christopher

Very many thanks for your letter of the 9th January - much appreciated.

We'll keep you posted on the development of events. Right now, assuming SHHD deliver the necessary assurances, we'll keep your team in reserve to test the 80°C/72 hours material which will very soon be with us. In the meantime Charles Forbes has agreed to look at the 75°C/72 hours product.

All being well we should just slip past the rocks I felt some days ago we were destined to founder on.

Kindest regards.

Yours sincerely

John D Cash
