Assessment of NHS products letter

1. Wd require STHD assurance  
re compensation but, in  
 any case "medical staff in  
 situation so diabolical no  
 way could he give a commit-  
 ment at the moment".  
 However would be happy to  
 help if above points resolved.
- ~~2. Given assurance re compensation~~
2. If Z8 proved acceptable in terms  
 of recovery and t/2 he would  
 be happy to use for routine  
 clinical purposes.
3. If, in fact, Z8 can't be assessed  
 before existing PFC VIII stocks are  
 exhausted he would prefer to  
 opt for old intermediate (NY)  
 product rather than commercial  
 purchases via Health Board.  $\Sigma$
