Dear Bob

Hepatitis Follow-up following SNBTS
Heat Treated VIII

I am most anxious that we look at the incidence of hepatitis and transaminitis in 'virgin' haemophiliacs who receive our heat treated factor VIII concentrate.

To this I end I have obtained, from Dr Charles Rizza, the protocol currently being used South of the border and have made suitable potential modifications for SHS use. I enclose a copy for your examination and a recent relevant publication.

I write to enquire whether you would be prepared to co-ordinate this SHS study on behalf of the SNBTS HQ Unit. I plan, some time in June/July to arrange a meeting of all the SHS Haemophilia Directors at which this proposal will be put to them.

I do hope you will be prepared to undertake this chore. Please feel free to give me a ring so that we can have a chat about it.

Kindest regards,

Yours sincerely

John D Cash

Encl.
