Dear Bob

Just a reminder - for the record - please buzz Peter and Ron on the question of whether PFC wish to join forces with Celltech on the large scale affinity purification of factor VIII, using their McAbs.

Kindest regards,

Yours sincerely

John D Cash

2 - major problems.

- (a) McAbs are non-union & product will be contaminated.
- (b) Armour have patent & as far as we know are not licensing to other manufacturers.
